BOBRICK

BUILDING VALUE SINCE 1906

innovations IN RESTROOM ACCESSORIES

sustainable GREEN

Environmental responsibility is a major consideration influencing product selection; a concept embraced by architects and their clients. Bobrick dispensers *significantly reduce paper towel use and waste*. Stainless steel models are fabricated of 50%-70% recycled material, as is the Koala Baby Changing Station frame. Many products comply with the US EPA Reduce & Reuse Conservation Resource Initiative; LEED contribution is available.

economical COST CONTAINMENT

Operating budgets are reduced because Bobrick products dispense lower-cost universal soap and towels as opposed to higher-priced proprietary consumables. Accessories are *less expensive to maintain* in terms of labor and materials, and require less frequent replacement. Restrooms are subject to impact from moderate wear and tear to *rampant vandalism*. Bobrick lowers capital renovation expense with durable, vandal-resistant restroom accessories.

compliant UNIVERSAL DESIGN

A major accessibility factor for ADA compliance is minimizing restroom accessory projection from the wall. Bobrick offers three Series with *all models designed for recessed installation*, meeting the Protruding Objects standard of the ADA and their Accessibility Guidelines. Additional new products, such as the dryers and vendors, provide new compliant choices for the specifier. Bobrick products meet ADA-ABA, ICC/ANSI, ASTM and EN Codes.

hygienic TOUCH FREE

Limiting cross contamination in public restrooms is a major concern. Many Bobrick restroom accessories *prevent human tactile interaction* or limit contact to the consumable as in paper towels. Bacteria inhibition is achieved with built-in materials such as the exclusive use of Microban® Antimicrobial Product Protection on all Koala Baby Changing Stations. And Bobrick's new universal roll towel dispensers are touch-free and fully automatic.

design CONSISTENCY

Consistency is one of the guiding principles of design excellence. Bobrick's three Series of restroom accessories provide *styling and finish consistency*; most accessory exteriors are fabricated of #4 stain-finish stainless steel. With Bobrick's new lease-free, automatic universal towel dispensers, there is no reason to mix proprietary leased, non-matching plastic and brushed stainless dispensers. Or, be held captive to locked-in proprietary purchase contracts.

For demonstration videos for all new products presented in this brochure, please visit bobrick-koala.com.

vendors NAPKIN | TAMPON

New ADA-compliant vendors are *the only push-button models available*. They operate with less than 5 pounds of force requiring no tight grasping, pinching or twisting of the wrist. Jam-resistant engineering: 25¢ and 50¢ single-coin slots, wrong coin and coin return by-pass mechanism for trouble-free operation, and empty indicators block coin slot after last product dispensed.

ConturaSeries

TOWEL DISPENSERS | WASTE RECEPTACLES

TowelMates dispense *one towel at a time* and are now a standard Contura feature eliminating multiple towel dispensing, and reducing paper usage and waste by 20% or more. LinerMates are also a standard Contura feature facilitating cost-efficient changeover of filled liners. The out-of-view installation of liners eliminates waste receptacle liner overhang.

TowelMate®

LinerMate®

SUSTAINABLE

ECONOMICAL

TowelMate DISPENSER RETAINER ACCESSORY

The benefits of TowelMate are now available as a retrofit accessory on all Bobrick dispensers and most similar models of other manufacturers. Multiple towel dispensing and the resulting waste and clean-up are now a high-cost maintenance condition of the past. Bobrick's new TowelMate dispenses M and C-fold towels one at a time with *usage and waste reduced by 20% or more.*

DESIGN

LinerMate LINER RETAINER ACCESSORY

LinerMate retrofit accessories are available for all Bobrick waste receptacles and similar models of other manufacturers. Liner changeover time is reduced, liners are fully utilized for zero waste and custodial time is minimized. And, the common unsightly practice of *folding liners over the front edge of waste receptacles is eliminated*, improving restroom appearance.

HYGIENIC

DESIGN

TrimLineSeries ADA DRYER

The 4" profile of the new surface-mounted dryer *complies with the ADA Protruding Objects standard*. For design and finish consistency with other accessories, the cover is #4 satin-finish stainless steel, with white epoxy also available. Unique airflow pattern provides a comfortable hand-drying experience, and the moderate (73 decibels) sound will not disturb others.

DESIGN

Koala[®] BABY CHANGING STATION

ADA-compliant KB200's flat panel design is available in four colors. Stout multi-point mounting system holds 200 pounds with virtually no deflection. Concealed hardware ensures safety, exclusive Microban inhibits bacteria growth, dual liner dispensers are keyed like all Bobrick products; bag hooks are also provided. *All designed to keep the adult and baby in close proximity.*

DESIGN

automatic UNIVERSAL ROLL-TOWEL DISPENSERS

New automatic, universal roll towel dispensers allow building management to purchase open-market towels, *saving 30% or more*. Until now, higher-priced proprietary towels, with locked-in purchase contracts, were the only option. Plus, #4 satin-finish stainless steel provides design consistency compared to leased, non-matching plastic and brushed stainless steel. Retrofit module converts folded towels to roll towels as desired.
